CAREER OBJECTIVE

Motivated Computer Science undergraduate with strong fundamentals in programming, Generative AI development, and problem-solving. Seeking an entry-level software engineering or internship role to apply technical skills, gain industry experience, and contribute to real-world projects.

TECHNICAL SKILLS

- Programming Languages: Python
- Web Technologies: HTML, CSS, TalwindCss, React
- Frameworks & Tools: FastAPI, Git, GitHub, LangChain, LangGraph, Pydantic, RAG , HuggingFace, OpenAI API, Large Language Models (LLMs), LangSmith, ReAct (Reasoning + Acting)
- Databases: SQLite, MongoDB, Vector Databases
- Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, REST APIs

SOFT SKILLS

- Problem-solving
- Team collaboration
- Quick learner
- Time management
- Adaptability

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science
MAKAUT / Elitte College of Engineering | 2023 – 2026
CGPA: 7 / 10

PROJECTS

AI Workspace Pro (Final Year Project) - https://github.com/Dues-ExMachina/Ai-WorkSpace-Pro

- Developed a backend-driven AI workspace using Python and FastAPI
- Designed REST APIs and integrated database functionality
- Improved understanding of scalable backend architecture and debugging

Expense Tracker Application - https://ai-chatbot-mcp-cpwrf58ktxybtxpq8swjku.streamlit.app/

- Built an agentic finance app using **LangChain** and **Groq** for natural language task execution.
- Implemented **Model Context Protocol (MCP)** to connect LLMs with modular external tools and servers.
- Orchestrated multi-step reasoning pipelines for automated tool execution and context-aware responses.

LANGUAGES - English (Professional), Hindi (Fluent), Bengali (Native)

INTERESTS - Artificial Intelligence and emerging technologies, Backend development, Competitive programming
